Transition Coal.

This rare and valuable Coal is a variety not quite changed into an anthracite, and it has only been discovered (in large quantities) at three places upon our globe, viz: at South Wales, Great Britain; at Donetz, in Russia, near the Biack Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commands the highest price. It is now mined upon the large estate (43,000 acres) of the Dauphin and Susquehanna Coal Company, situated in Pennsylvania, and it is nearer to the cities of Battinore and Washington than the coal of any other region. For easy ignition, durability of fire, complete combustion, easy adaptation to the temperature of the weather, and its great power in generating heat, it is the max coal in the world. It has the inflammability of the bituminous coal, with the cleanliness of the anthracite, and a greater durability than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is consumed. Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublescome practice of sifting their ashes to obtain more fuel. In burning the Transition Coal there is no words, for the small coals made by handling, burn as well as ordinary coal. All should be taken out.

A very erroneous impression exists with many persons that the heavy terms as a seal as processing the produce of seal and the processor of a seal coals.

ourned together. It screened at all the dust only should be taken out.

A very erroneous impression exists with many persons that the heaviest coals are the most economical for ordinary purposes. This might be the case if coals were sold by measurement, but never when they are sold by weight. In Taylor's valuable work, (Statistics of Coal,) the details are given to show that 31 pounds of a free-burning red ash yielded more heat to a room in 15 hours, than 37 pounds of a heavy white ash coal, making the red ash, at \$5.50, to be more economical than the white ash at \$4.61 per ton. Any person secustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

er kinds, when tested by the weight and burnt in a suitable manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a fire made of seasoned hickory or oak wood, and it would be equally as absurd to apply a blost constantly to a free-burning coal. But the heavy white ash anthracites cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various patterns of stoves, furnaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has nover been done with complete success. In very contrivance, however, which has been invented to burn coal, the transition variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of grates or stoves when this coal is used. The draft alone is to be regulated by a damper. In introducing this new coal for the first time, prepared as it now is by steam power machinery for domescamper. In introducing this new coal for the NTS time prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say that the celebrated free-burning red ash veins in the Peach Orchard district, near Pottsville, are a continuation of the Dauphin veins, and they approach the nearest in value to the Twansition, co.

DR. KITTO'S POPULAR CYCLOPÆDIA

DR. KITTO'S POPULAR CYCLOPÆDIA
of Popular Literature.

ONDENSED from the larger work. Bp John Kitto, D., author of "Pictorial Bible," "History of Palestine," "Scripture Daily Readings," &c. Assisted by numerous distinguished Scholars and Divines, British, Continental, and American. With numerous illustrations. One volume, octave, 812 pp. Cloth, \$3; Sheep, \$3.50.

The popular Biblical Cyclopædia of Literature is designed to furnish a dictionary of the Bible, embodying the products of the best and most recent researches in biblical literature, in which the scholars of Europe and American have been engaged. The work, the result of immense labor and research, and enriched by the contributions of writers of distinguished eminence in the various departments of sacred literature, has been, by universat consent, pronounced the best work; of its class extant, and the one best suited to the advanced knowledge of the present day in all the studies connected with theological science.

The pictorial illustrations, amounting to more than three hundred, are of the very highest order of the art. Letters from Hon. Theodore Frellinghuyeen, Judge McLean, Edward Everett, Robert C. Winthrop, Simon Greenleaf, and more than fifty of the most distinguished Ministers and Laymen of different religious denominations in the country have been received, recommending the work in the strongest terms as admirably adapted to Ministers, Subbath School Teachers, heads of families, and all Bible Students.

Whig Meeting at Pottsville, Pa. Pottsville, Sept. 25.—There is an immense gathering here. Crowds are coming in from all

lirections, and some forty cars, all crowded, have errived from Philadelphia, Berks, and Montgomery. The streets are thronged, and the town is literally alive. Two o'clock is the hour fixed for the organization of the assemblage.

The procession of miners is just beginning to arrive, presenting a most imposing spectacle.

The afternoon and evening will be occupied in speeches, from half a dozen different stands.

Second Despatch. POTTSVILLE, Sept. 25 .- The Whigs of this section held an immense mass meeting here to-day, agreeably to the call of the Whig State Central committee. Large delegations came in from the arrounding counties and districts, and some forty cars, all filled with crowds from Philadel-

ohia, Berks, and Montgomery counties, arrived. The scene presented was an unusual one in this vicinity. Flags and banners were hung out at various points throughout the town, and the notes of the many fine bands of music in attendance imparted much animation and enthusiasm to the

At two o'clock, p. m., the meeting was organ-zed in front of the Town Hall, and was attended by an immense number of persons.

The most interesting feature of the demonstraration was a large procession of the miners from the adjacent mines, who came to the meeting, bearing flags, and accompanied with a band of

presidents and secretaries. Among the speakers

were the Hon. James Cooper, Hon. E. Stanly, and Hon. J. S. Pennypacker.

From the Fishing Grounds. GLOUCESTER, Sept. 27 .- The schooner Mary Howton, Captain McKenzie, has arrived from the whing grounds, and reports that American ves-sels were still interrupted by English cruizers. A letter from the captain of the Careline Knight, before reported seized, states that at the time he was captured there were three vessels nearer the shore than he was, and that he had no idea of violating the treaty. He believed the value of his vessel and cargo was the main cause of the seizure.

Young Lady's Counselior. SIXTH EDITION.

SINTH EDITION.

THE YOUNG LADY'S COUNSELLOR: or, Outlines and Illustrations of the Sphere, the Duties, and the Dangers of Young Women. Designed to be a guide to true happiness in this life, and to Glery in the life which is to come. By Kev. Daniel Wise, A. M.

This work has been received with very great favor whereever it is known. The editor of the Northern Christian Advecate says: "We had heard good things of this work, and on reading it, most cheerfully add our testimony to its merica. It is not adventuous in its light—aims at no terra inequate, but most gently and assiduously cultivates ground already known. Its sage counsels, enlivened with illustrations, are worth of a place in every lady's mind. The style is not ormate—it is better—flowing like the limpid, transparent brook over its pebbly be diffusing health and pleasure wherever it goes. The work is not wanting in nerve and originality; it is sufficiently removed from that class of jedine and forceless compilations scissored from preceding authors, and glued together by the mere book-maker. For the objects had in view, it is one of the best works we have ever seen.
